

Workplace & Employee Safety

As an employer, you have a responsibility to help keep employees safe on the job and to create a safe workplace for everyone. Workplace and employee safety mean so many things. However, like any industry, credit unions are not immune to accidents and incidents that can disrupt operations, harm employees and impact members/visitors, such as:

- Robbery
- Active shooter
- Kidnapping and extortion
- Bomb threats
- Social movement
- Employee, member and visitor behavior
- Slips, trips & falls

Speaker: Michael Petrone is a Risk Management Consultant in Risk and Compliance Solutions with TruStage. In this role he is responsible for assisting credit unions in identifying areas of risk in their operations and recommending appropriate control to reduce loss exposures. Mike specializes in the areas of workplace operations, physical security, internal controls, and employee safety.
